OBJECTIVES

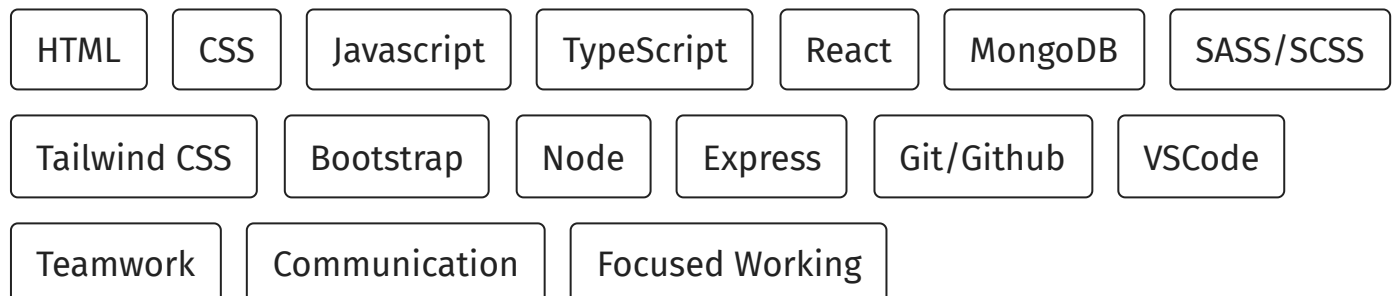

CS graduate and passionate front-end web developer with a proven ability to collaborate effectively with teams. With passion for both personal growth and front-end development, I've finished more than 30 projects on Frontend Mentor and successfully gained certificates regarding React and Javascript from Udemy while continue practicing to improve my skills.

EDUCATION

BSc. Computing Science, University of Alberta

- Graduated with Distinction
- GPA: 3.5+

SKILLS/TOOLS

PROJECTS

Kanban Task Management Webapp [Github]

- Built a Kanban Task Management web application similar to Trello, integrated with a real-time database with MongoDB to keep track of any changes from CRUD operations performed on boards and tasks.
- Implemented drag-and-drop functionality which helps user to change the task status and re-order them in a column.
- Utilized Tailwind CSS for a user-friendly and responsive UI interface.
- **Stacks:** React, Typescript, Node, Express, MongoDB, Tailwind CSS

Ecommerce Website [Github]

- Created a fullstack Ecommerce Website that fetches the products through API endpoints, and customer can look into different categories, add the product to the cart, edit product quantities in the cart, and proceed to checkout.

- Applied React and SASS to implement an interactive and responsive website.
- Implemented backend service using Node and Express, and utilized MongoDB as the database to store the products as well as orders.
- **Stacks:** React, Node, Express, MongoDB, SASS

Social Distance - Distributed Social Media Platform [Github] [↗](#)

- Worked in a team of 5 member to develop a distributed social media similar to diaspora which can be linked to multiple other social media networks through API endpoints and allows their users to cross communicate between their social networks.
- Applied React to implement the interface that allows instant update in the view without reloading the whole page.
- Utilized Styled Component to style the web app and make it a responsive mobile-friendly web application.
- **Stacks:** React, Typescript, Styled Component, Django

Note App [Github] [↗](#)

- Designed and implemented a simple fullstack note web application that allows user to signup, login and logout as well as create, read, delete, and update the notes (CRUD).
- Created backend authentication service using Node, Express and JWT library.
- **Stacks:** React, Node, Express, MongoDB, CSS

EXPERIENCES

Frontend Web Developer [Remote], Mootsy

Aug 2021 – Jan 2022 | Hanoi, Vietnam

- Worked closely with the product team to design and optimize UI/UX.
- Implemented dynamic and responsive mobile-friendly front-end solutions using HTML, CSS, Javascript, PHP and Bootstrap.
- Ensured the project was compiled in accordance to best practices and company standards.
- Worked in an agile environment with daily stand-ups through Zoom, kept track of user stories/bugs in the project using Trello and reviewed the updated code before deployment.

Frontend Developer Intern, ABIVIN

Apr 2016 – Sep 2016 | Hanoi, Vietnam

- Applied best practices in HTML, CSS and Javascript to develop interactive webs based from project requirements and static images of website designs.
- Performed daily maintenance tasks to ensure the ABIVIN website was up-to-date and free of errors.
- Fixed frontend bugs, Javascript errors and wrote unit test to ensure code was tested.

CERTIFICATES

- React Front To Back 2022 - Udemy
- Modern Javascript From The Beginning - Udemy
- React, NodeJS, Express & MongoDB - The MERN Fullstack Guide - Udemy
- Understanding Typescript - 2023 Edition
